

# Medical/Optometric Information Disclaimer

There is considerable evidence that some people benefit from the use of coloured overlays when reading. These are sheets of coloured transparent plastic that when placed on the page, can alleviate visual symptoms that sometimes accompany conditions such as Dyslexia (and other learning difficulties), Migraine, Autism, Visual discomfort and Glare.

The “*Intuitive Overlays*” were designed by Professor Arnold Wilkins of the Visual Perception Unit at Essex University and are manufactured to the highest quality control standards.

## 1. Credit

1.1 This document was created by I.O.O Sales Ltd for guidance for Intuitive Overlays/testing packs.

## 2. Who should test with Intuitive Overlays?

2.1 Testing with Intuitive Overlays should be carried out by eyecare professionals (e.g. optometrists, orthoptists, opticians, ophthalmologists), education professionals (e.g. teachers, educational psychologists), or researchers.

2.2 The symptoms that are helped by coloured filters can sometimes result from other optometric problems. Therefore, it is recommended that before using coloured overlays a person has a full eye examination (i.e., with an optometrist).

## 3. Who can buy Intuitive Overlays?

3.1 Usually, coloured overlays are purchased for or by one of the professionals listed in 2.1.

3.2 Coloured overlays can be bought by members of the public, but I.O.O. Sales Ltd recommends that this only takes place after testing by one of the professionals listed in 2.1 and after other causes of symptoms have been excluded as recommended in 2.2.

## 4. Medical/Optometric assistance

4.1 As noted above, Intuitive Overlays do not replace the need for optometric testing or for, when required, conventional optometric appliances (e.g., spectacles).

4.2 If you have any specific questions about any ocular or medical matter, you should consult your optometrist or other professional healthcare provider in the first instance.

4.3 You should never delay seeking medical care or disregard medical advice.

## 5. Limits upon exclusions of liability

5.1 Nothing in this disclaimer will:

- (a) limit or exclude any liability for death or personal injury resulting from negligence;
- (b) limit or exclude any liability for fraud or fraudulent misrepresentation;
- (c) limit any liabilities in any way that is not permitted under applicable law; or
- (d) exclude any liabilities that may not be excluded under applicable law.

### Information Disclaimer

This is a medical/optometric disclaimer document, designed for the safe use of Intuitive Overlays/testing pack. Medical/optometric information, for the purpose of disclaiming liability - or rather attempting to disclaim liability - in relation to that information treatments, medical devices and/or health products. The document asserts that the medical/optometric information does not amount to advice, and if advice is needed appropriate professional help should be sought. The document also asserts that no warranties or representations are given in respect of the medical/optometric information, and that I.O.O Sales Ltd should not be held liable if a user suffers any injury or loss after relying upon the information given.
